

# Badge for Day of Action contribution

**Rationale:** to encourage and recognise the contribution to the Greenpeace Planet 4 Day of Action, we recommend issuing a digital credential. This would feature official Greenpeace branding and therefore have value in the eyes of participants.

The digital credential would be issued in alignment with the Open Badges specification, meaning that metadata about the Day of Action is embedded into the badge itself. For more details, see [openbadges.org](https://openbadges.org) or We Are Open Co-op's slide deck: [A bluffer's guide to badges](#)

There are a number of platforms for badge issuing, as outlined in [this blog post](#). We would recommend using one of the following platforms:

- [Badgr](#)
  - [Open Badge Factory](#)
  - [OpenBadges.me](#)
- 

## Metadata

### Badge name

Greenpeace Planet 4 Day of Action contributor

## Badge image

## Badge criteria

This badge is issued to all contributors to the Greenpeace Planet 4 project 'Day of Action' on [DATE]. These contributions span development, design, and documentation of the project.

## Issuer

Greenpeace International

---

**Note:** the following will be dealt with automatically by the badge issuing platform:

- Badge URL
- Recipient

There are additional, optional fields, such as:

- Standards alignment (N/A)

- Evidence URL (*potentially a nice way to point to what the contributor actually did during the day of action - e.g. URL of pull request*)
- Tags (*N/A*)
- Expiration date (*N/A*)
- Endorsement (*N/A*)

## Appendix

The Fedora Project has a mature badge ecosystem which has been in development since 2013. This now contains hundreds of professional-looking badges for a range of scenarios.
