

GREENPEACE

Establishing Open Principles with the Planet 4 team

A Collaboration between We Are Open Co-op and Planet 4

Overview

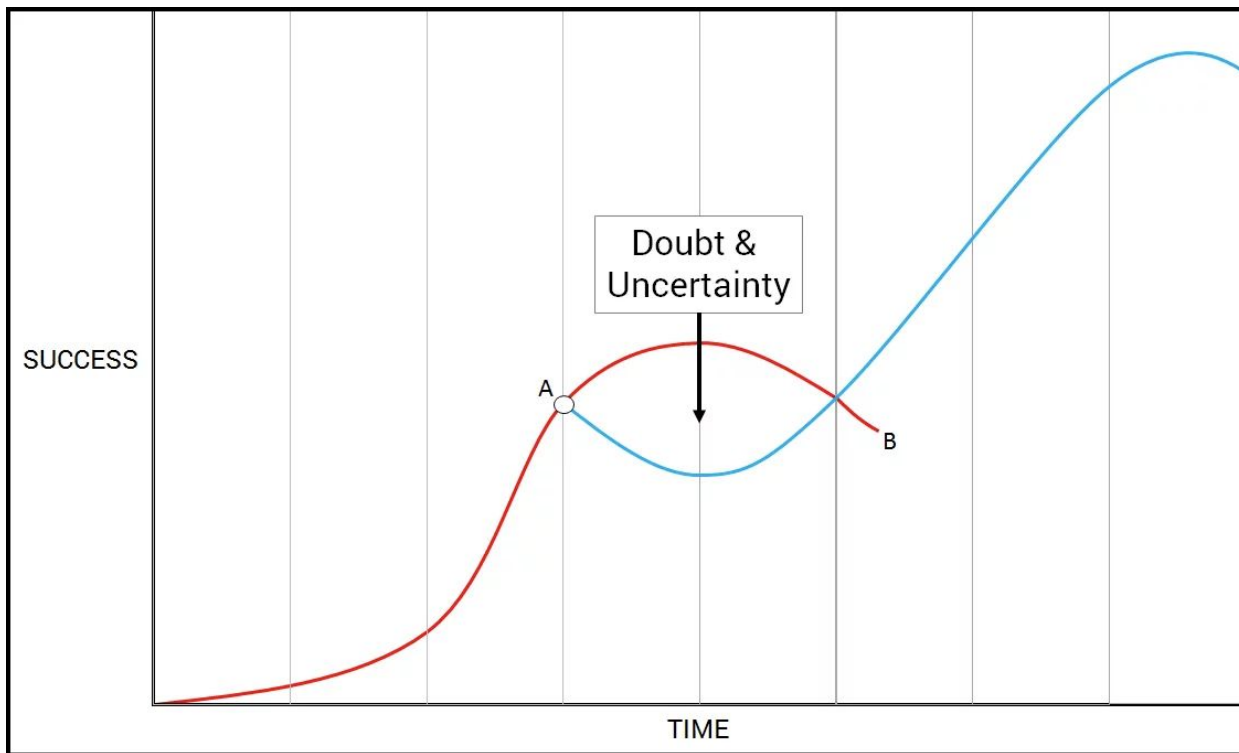

1. What we did
2. How we did it
3. Next steps

1. What we did

Open Leadership	
Steering Committee & Stakeholders 	• Laura continues to serve on the SC, and We Are Open helps rally stakeholders to contribute to the project with NRO resources. • Advise on the overlap and responsibility between these two groups • Advise on criteria for overlapping stakeholders (e.g. rotating NRO membership in the SC of Planet 4) • Facilitate relationships with other GP departments to advance project goals (e.g. Comms Hubs)
Critical Friend 	• For the project sponsor as well as the team • Advise on workload and priority based on community engagement in tandem with organizational goals • Tech and trend insights and recommendations
Open project standards 	• Help facilitate a transition to peer review code culture • Research, advise and collaborate with the team on appropriate processes and standards • Policy development and iteration • Team training • Advise and collaborate on overt and explicit feedback pathways

Open Mindset	
Coordination 	• Coordinate the community calls and workload • Translate the community calls into actionable information for the PM and SM, while engaging with the community • Onboard contributors and community • Collaborate with the scrum lead to track open dev and design and help course correct p4 to GitLab issues
Team building 	• Support design thinking and collaborative decision making within the team • Facilitate and run positive team building workshop and 2020 roadmapping session

Open Engagement	
Marketing and PR 	• FOSS conferences + PR • Publish blog posts to our extensive networks • Prompting the team to blog • Facilitating community comms contributions
Partnership MGMT 	• Managing the RH relationship • Looking for new collaboration opportunities

In our proposal, we referenced the 'Sigmoid Curve'

Planned Day of Action to
model open leadership
and open practices

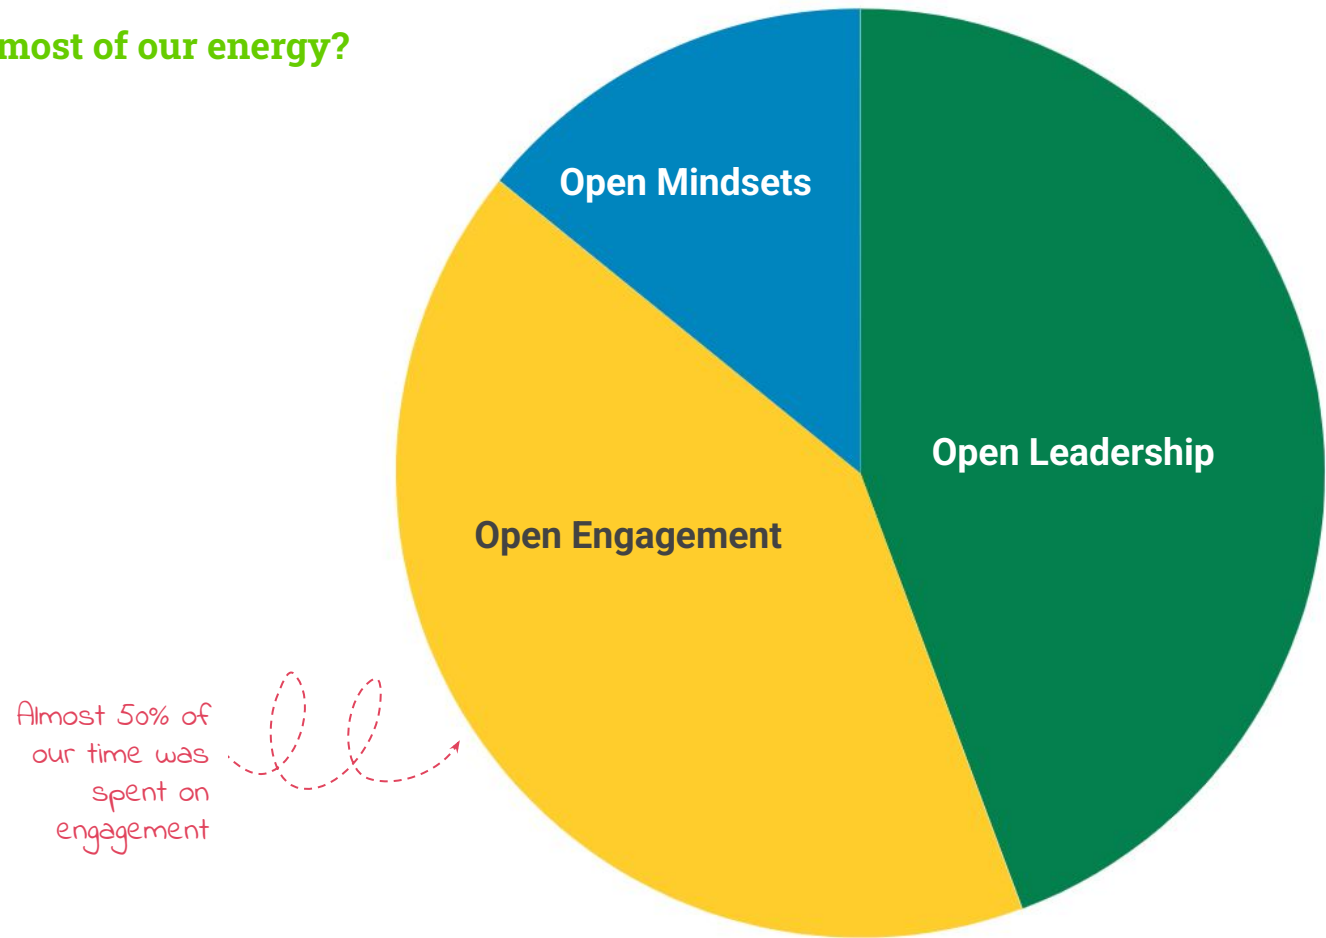

Reviewed Day of Action
plan based on identified
gaps in knowledge /
preparedness

Ran openness audit

Developed training on
open principles and
practices based on audit
results

2020

Where did we focus most of our energy?

2. How we did it

Looking at "5 Star Futures"

Onboarding

Fully documented onboarding process, first contact point and "go-to" people depending on the area are clear to the whole team.

Outboarding

clear and dedicated outboarding channels for contributors to stay in the loop and get opportunities to help again in the future. A publicly-available place listing opportunities to contribute that are constantly maintained.

Case Studies

Each partnership / contribution produces case studies (Handbook), stories (Medium posts) and video tutorials (if applicable).

Buddying

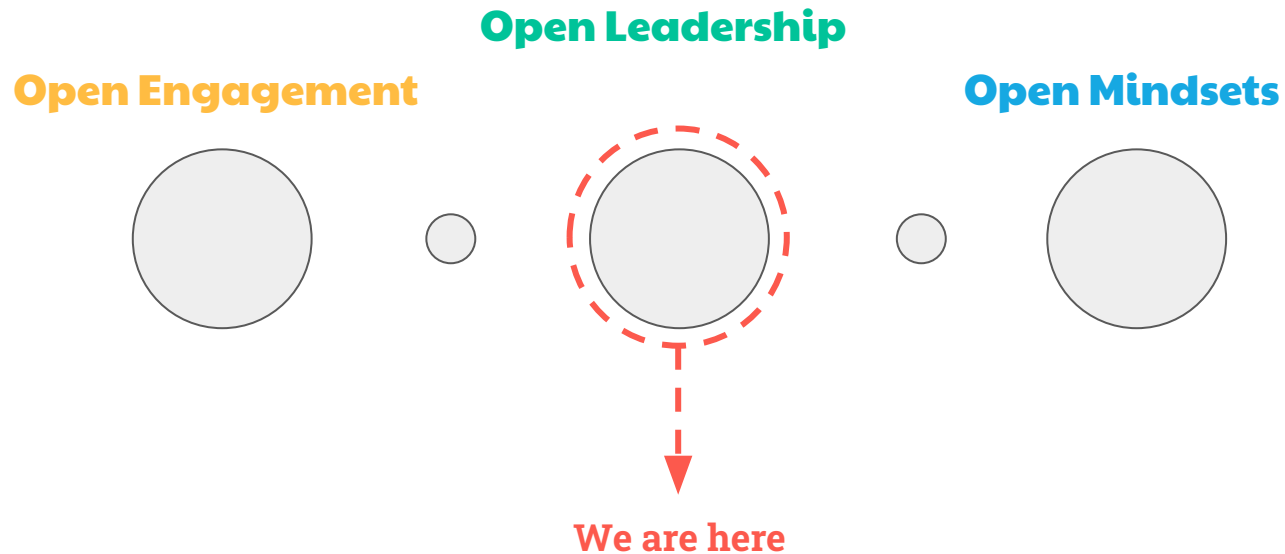

"buddying" practices constantly carried out for all areas of contribution + the contributor/s host a community call to share outcomes

End-to-end process

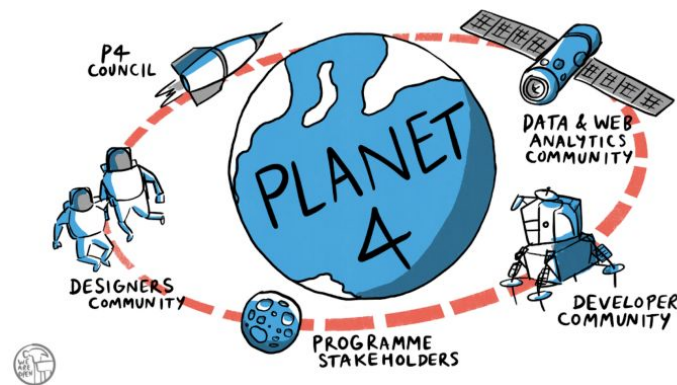

We have a full end-to-end process constantly evolving and followed by the whole P4 team. Team members take ownership.

How do we get to those 5 Star Futures?

METHODOLOGY

OPEN LEADERSHIP TASKS

Case studies		09	Working
Write guideline for embedding a peer review c...		09	Won't do
Work on email course		09	Done
Put together options for GitHub sponsors		09	Done
Badge issued by WAO for openness		to 3	Won't do
Theme Owner interview roundup		09	Done
Define criteria for overlapping stakeholders / ...		09	Won't do
contribute to 2020 community strategy		09	Done
Establish a schedule of online FOSS conferen...		09	To do
Diginomica interview		09	Done
write proposal for All Things Open		09	Done
arrange someone for RH Summit		09	Done

(tasks from our Monday.com tracker)

MEETINGS REVIEW

WAO Project Management Meetings	32 Items
Open strategy	17 Items
Stakeholder/Partnership Calls	23 Items
Community Meetings	20 Items
Steering Committee Meetings	5 Items
GP/WAO relationship meetings	19 Items
GP Project Management Meetings	13 Items

Meeting Types

Project Management – weekly meetings kept us all in sync

Open Strategy – regular meetings with Walter and Natasja

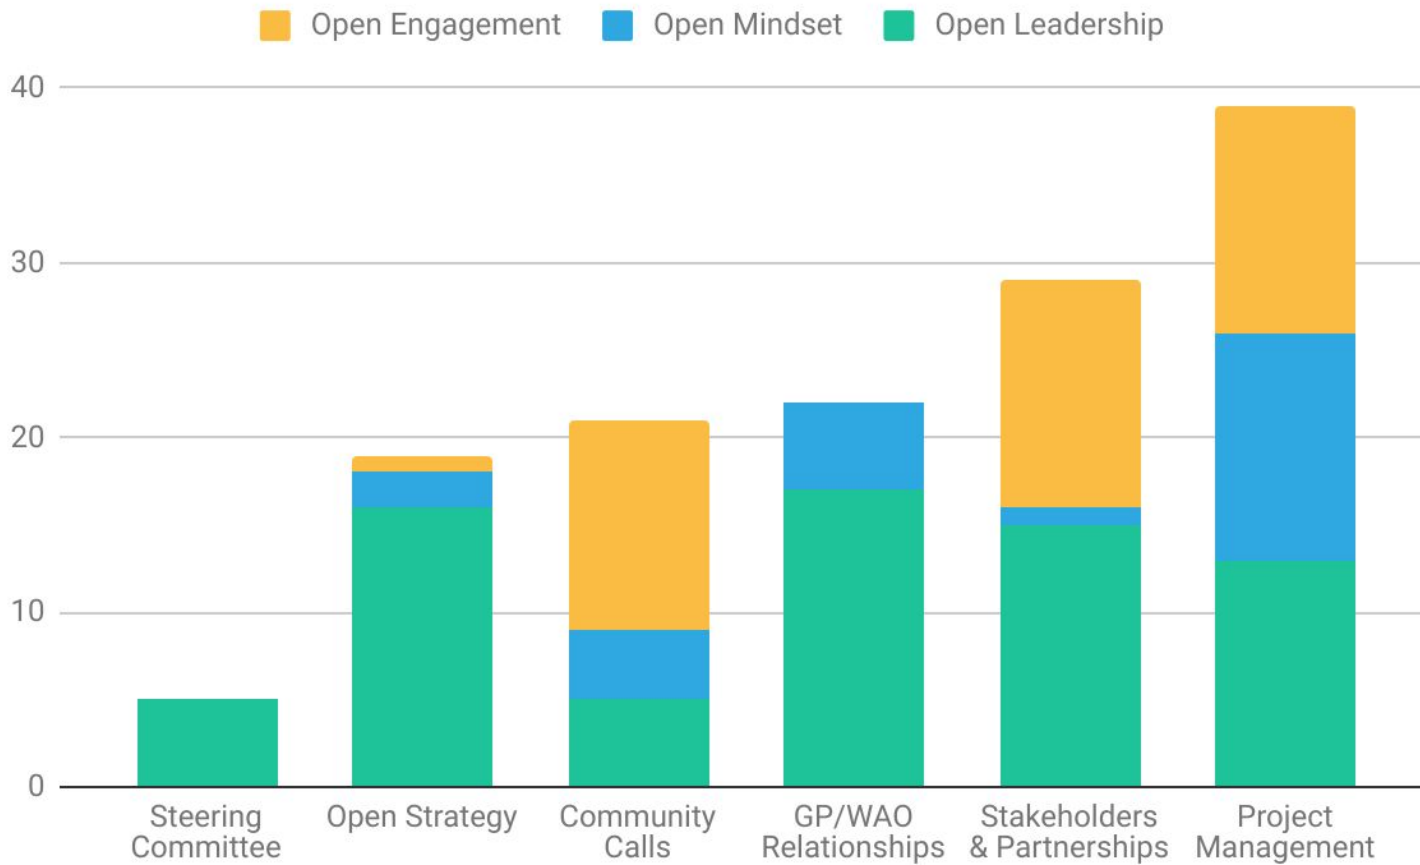

Stakeholder & Partnerships – meetings with Red Hat + community stakeholders

Community Calls – weekly calls track leads + co-designing design community calls

WAO/GP Relationships – regular check-in calls + critical friend 1:1 calls

Meeting Tags

3. Next steps

Reflect — what has the team learned about Open Leadership, Mindsets, and Engagement? (**Open FAQ session**)

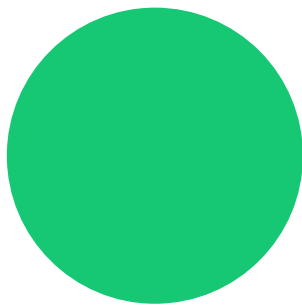

Plan — how might we use a series of workshops between now and Christmas to reinforce these mindsets and skillsets? (**1 day/week contract**)

Grow — what does the team need to be set up for success in 2021?

Workshops

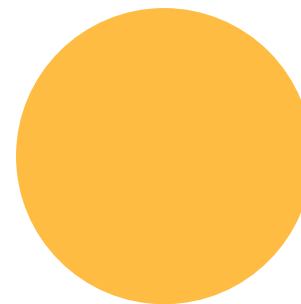

Design

(Oct 2020)

Deliver

(Nov 2020)

Follow-up

(Dec 2020)

GREENPEACE

Thanks!

What's next in the collaboration between We Are Open Co-op and Planet 4?
